PLANNING INTELLIGENCE

Prepare for demand

Use the selected 30D forecast as a planning signal for inventory, staffing and procurement.

8,66,443 9,87,952

avg sales/day · 30D

peak sales/day · 30D

RECOMMENDED ACTIONS

What teams should do next

- Protect peak coverage**
Review inventory buffers before the highest projected demand days.
- Align staffing**
Use the demand curve to schedule operational capacity.
- Coordinate procurement**
Translate the forecast into replenishment planning.
